COSMETIQUE

**based on human cells
technology**

up to 80% longer cells live time

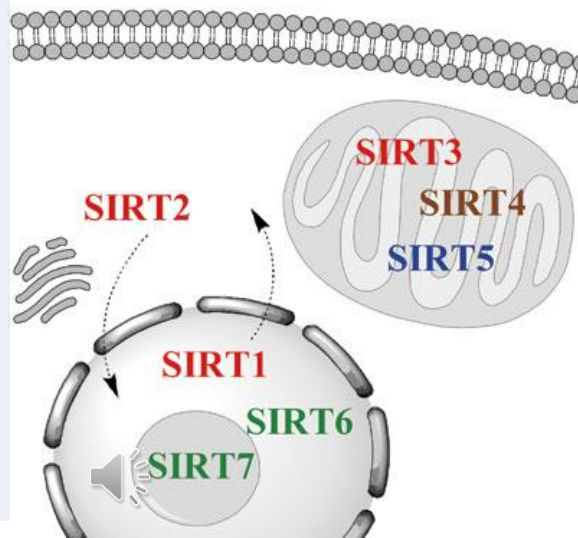

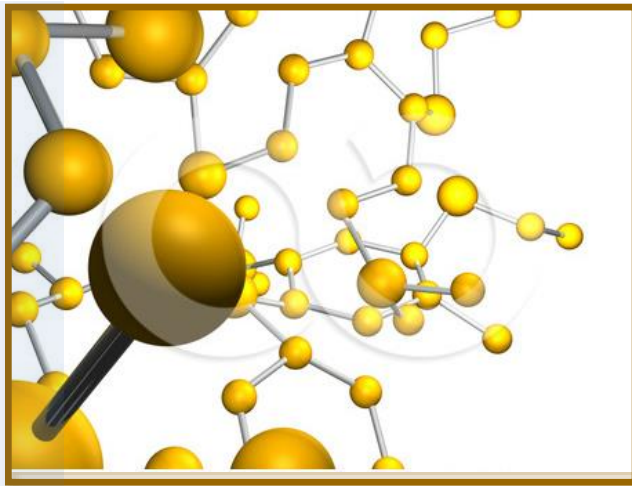

Designed,
developed and
made in Germany

The ageing process is essentially caused by change within the cells, in the cell core and the mitochondria, the cells power plants. The result is loss of cells and hardening of the tissue.

Jean D'Arcel research increasingly concentrates on the changes, which happen within the cell, ultimately the new **MIRATENSE** anti aging concept was born.

MIRATENSE LIFT DETOX

the cell
revivalist

Incorrect reproduction of our cell is one of the main reasons for early skin ageing.

The ageing skin cells can be revitalised by activating the enzyme **SIRTUIN 1**, these influence the cell's life cycle and are jointly responsible for faultless reproduction of our cell.

Pro-Sirt1 | SURVICODE™ patented ingredients, activates the enzyme SIRTUIN 1.

It's proved, that **Sirtuin proteins delay the cells aging process**, the skin recovers its natural balance and conserves its youthfulness.

R⁴-Detox-complex, patented ingredients: based on **Celldetox / Alistin / Lipochroman-6 / Detoxophane**, protects the tissue and the cell structures against free radicals.

Thalassine | sea chamomile extract (Substitute Deepaline) with Botox like function, a new high-density anti-aging strategy to get rid of the deepest wrinkles.

Gatuline Expression® (based on **Acmella oleracea plant**) for instant reduction of expression lines.
