- Panthenol

# Phyto StemCell

collagen face  
mask

Cream mask as a revitalizing fountain of youth for the skin. **Marine collagens** immediately show a tightening effect, while apple stem cell extract helps to give new vitality to the epidermis and stave off its aging process. Thus, the skin can optimally regenerate and enjoy a flying start toward a smooth and animated appearance full of youthfulness.

**Application:**  
Apply the mask onto the cleansed skin, and allow to work in for 10-15 minutes. Remove residues with cold or lukewarm water.

Masks have an intensified effect when the skin is perfectly prepared. This can be achieved by a peeling, e.g. enzymatic scrub powder or lotion exfoliating tonic. Recommended for use in cabin and for use at home.

Product- No. 1177, contains 50 ml.

Designed,  
developed and  
made in Germany
