Active substances:

- Gatuline Expression (extract from Parakresse) • Exopolysaccharide
- Shea Butter • Almond Oil • Macadamia Nut Oil

Phyto StemCell

arcelox® face
mask

Contains Gatuline Expression, a novel plant extract which is derived from the Jambu plant. The small exotic plant from Peru and Brazil is a healing plant, which has already since long been used in medicine, showed a rapid and visible reduction to wrinkles. From this a revolutionary active ingredient, Gatuline Expression, was developed, which reduces the intensity of the muscle contractions, where expression lines are relaxed.

Application:

Apply the mask onto the cleansed skin, and allow to work in for 10-15 minutes. Remove residues with cold or lukewarm water.

Masks have an intensified effect when the skin is perfectly prepared. This can be achieved by a peeling, e.g. enzymatic scrub powder or lotion exfoliating tonic. Recommended for use in cabin and for use at home.

Product- No. 1178, contains 50 ml.
